

Bio-No Rinse

Clean & Leave Floor Treatment

NATURALLY OCCURRING NON-PATHOGENIC MICROBES
BREAK DOWN SOILING ON FLOORS, SAVING HOURS OF
HARD LABOUR AND EXCESSIVE WATER USE!

HARNESSING NATURAL BIO-ENZYMES

NO-RINSE FLOOR CLEANER FOR HEAVY SOILING ON FLOORING AREAS, UTILISING THE NATURAL POWER OF NON-PATHOGENIC MICROBES TO PENETRATE FOOD SOILING, OILS & ANIMAL BASED FATS & WASTE.

- Maintains clean, odour-free floors
- Keeps on working after application
- Less work required
- Harnessing the power of Nature
- Naturally biodegradable
- Scented

Directions:

Floor Cleaning: Dilute at 1-2% solution (1:99 to 1:49, 10-20ml or 2-4tsp per 1 litre) with warm or cold fresh tap water. Mop over and squeegee off, leaving a layer of product to allow enzymes to continue working. Ensure there is an even distribution of product and leave. Repeat daily for 2 weeks, or until floors are at their desired level of clean, then maintain (at the lowest suitable dilution rate) as required.

Stubborn Stained Areas: Dilute to 10% solution (1:9, 100ml or 2 5 cup per 1 litre) with cold fresh tap water and use a foaming spray head to surfaces to reduce odours and to breakdown soiling. Once rinsed surfaces can be foam-sprayed again and left. This will help reduce future soiling and make subsequent cleaning easier.

Concrete Areas: Sluice the area with a 5% solution (1:20, 50ml or 1 5 cup per 1 litre) diluted with warm or cold fresh tap water. For other areas such as walls, stairs, rubbish bins and ramps where organic soiling can accumulate, allowing to soak in for as long as possible. Agitate with broom to help dislodge gross soiling. Rinse to finish deep cleaning and leave an applied layer of 1-2% solution (1:99 to 1:49, 10-20ml or 2-4tsp per 1 litre) over the area and leave.

20 Litres FK-BIONR20
5 Litres FK-BIONR05
1 Litre (Chamber) FK-BIONR01

FLOOR MOPPING CLEANER

Use product at 1:20 (250MLs per 5L WATER)

Food Plants: Bio-Fresh products are designed to rid areas of typical plate count problems; floor and other wider environmental areas are not likely to have swabs / plate count results compromised. All MPI facility-based operators should rinse prior to swabbing.

How it Works

Bio-Fresh cleaners contain naturally occurring non-pathogenic microbes.
